

The μA78M15 is obsolete and no longer is supplied.

SLVS059M – JUNE 1976 – REVISED JULY 2003

- 3-Terminal Regulators
- Output Current Up To 500 mA
- No External Components
- Internal Thermal-Overload Protection
- High Power-Dissipation Capability
- Internal Short-Circuit Current Limiting
- Output Transistor Safe-Area Compensation

description/ordering information

This series of fixed-voltage integrated-circuit voltage regulators is designed for a wide range of applications. These applications include on-card regulation for elimination of noise and distribution problems associated with single-point regulation. Each of these regulators can deliver up to 500 mA of output current. The internal current-limiting and thermal-shutdown features of these regulators essentially make them immune to overload. In addition to use as fixed-voltage regulators, these devices can be used with external components to obtain adjustable output voltages and currents and also as the power-pass element in precision regulators.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

PRODUCTION DATA information is current as of publication date. Products conform to specifications per the terms of Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

μ A78M00 SERIES POSITIVE-VOLTAGE REGULATORS

SLVS059M – JUNE 1976 – REVISED JULY 2003

schematic

Resistor values shown are nominal.

μA78M00 SERIES **POSITIVE-VOLTAGE REGULATORS**

SLVS059M – JUNE 1976 – REVISED JULY 2003

The μA78M15 is obsolete and
no longer is supplied.

absolute maximum ratings over virtual junction temperature range (unless otherwise noted)†

| | |
|--|----------------|
| Input voltage, V_I | 35 V |
| Operating virtual junction temperature, T_J | 150°C |
| Lead temperature 1,6 mm (1/16 inch) from case for 10 seconds | 260°C |
| Storage temperature range, T_{stg} | –65°C to 150°C |

† Stresses beyond those listed under “absolute maximum ratings” may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under “recommended operating conditions” is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

package thermal data (see Note 1)

| PACKAGE | BOARD | θ_{JC} | θ_{JA} |
|------------------|-------------------|---------------|---------------|
| POWER-FLEX (KTP) | High K, JESD 51-5 | 19°C/W | 28°C/W |
| SOT-223 (DCY) | High K, JESD 51-7 | 4°C/W | 53°C/W |
| TO-220 (KC/KCS) | High K, JESD 51-5 | 3°C/W | 19°C/W |

NOTE 1: Maximum power dissipation is a function of $T_J(\text{max})$, θ_{JA} , and T_A . The maximum allowable power dissipation at any allowable ambient temperature is $P_D = (T_J(\text{max}) - T_A)/\theta_{JA}$. Operating at the absolute maximum T_J of 150°C can affect reliability.

| Short-circuit output current | $V_I = 35\text{ V}$ | | | 240 | | mA |
| Peak output current | | | | 0.7 | | A |

† All characteristics are measured with a 0.33-μF capacitor across the input and a 0.1-μF capacitor across the output. Pulse-testing techniques maintain T_J as close to T_A as possible. Thermal effects must be taken into account separately.

electrical characteristics at specified virtual junction temperature, $V_I = 23\text{ V}$, $I_O = 350\text{ mA}$, $T_J = 25^\circ\text{C}$ (unless otherwise noted)

| PARAMETER | TEST CONDITIONS† | | μA78M15C | | | UNIT |
|---|---|---|----------|-----|-------|-------|
| | | | MIN | TYP | MAX | |
| Output voltage | $V_I = 17.5\text{ V to }30\text{ V}$, $I_O = 5\text{ mA to }350\text{ mA}$ | | 14.4 | 15 | 15.6 | V |
| | | $T_J = 0^\circ\text{C to }125^\circ\text{C}$ | 14.25 | | 15.75 | |
| Input voltage regulation | $I_O = 200\text{ mA}$ | $V_I = 17.5\text{ V to }30\text{ V}$ | | 10 | 100 | mV |
| | | $V_I = 20\text{ V to }30\text{ V}$ | | 3 | 50 | |
| Ripple rejection | $V_I = 18.5\text{ V to }28.5\text{ V}$, $f = 120\text{ Hz}$ | $I_O = 100\text{ mA}$, $T_J = 0^\circ\text{C to }125^\circ\text{C}$ | 54 | | | dB |
| | | $I_O = 300\text{ mA}$ | 54 | 70 | | |
| Output voltage regulation | $I_O = 5\text{ mA to }500\text{ mA}$ | | | 25 | 300 | mV |
| | $I_O = 5\text{ mA to }200\text{ mA}$ | | | 10 | 150 | |
| Temperature coefficient of output voltage | $I_O = 5\text{ mA}$, $T_J = 0^\circ\text{C to }125^\circ\text{C}$ | | | –1 | | mV/°C |
| Output noise voltage | $f = 10\text{ Hz to }100\text{ kHz}$ | | | 90 | | μV |
| Dropout voltage | | | | 2 | | V |
| Bias current | | | | 4.8 | 6 | mA |
| Bias current change | $V_I = 17.5\text{ V to }30\text{ V}$, $I_O = 200\text{ mA}$, $T_J = 0^\circ\text{C to }125^\circ\text{C}$ | | | | 0.8 | mA |
| | $I_O = 5\text{ mA to }350\text{ mA}$, $T_J = 0^\circ\text{C to }125^\circ\text{C}$ | | | | 0.5 | |
| Short-circuit output current | $V_I = 35\text{ V}$ | | | 240 | | mA |
| Peak output current | | | | 0.7 | | A |

† All characteristics are measured with a 0.33-μF capacitor across the input and a 0.1-μF capacitor across the output. Pulse-testing techniques maintain T_J as close to T_A as possible. Thermal effects must be taken into account separately.

POST OFFICE BOX 655303 • DALLAS, TEXAS 75265

DCY (R-PDSO-G4)

PLASTIC SMALL-OUTLINE

KTP (R-PSFM-G2)

PowerFLEX™ PLASTIC FLANGE-MOUNT PACKAGE

- NOTES:
- All linear dimensions are in inches (millimeters).
 - This drawing is subject to change without notice.
 - The center lead is in electrical contact with the thermal tab.
 - Dimensions do not include mold protrusions, not to exceed 0.006 (0,15).
 - Falls within JEDEC TO-252 variation AC.

PowerFLEX is a trademark of Texas Instruments.

KCS (R-PSFM-T3)

PLASTIC FLANGE-MOUNT PACKAGE

NOTES:

- A. All linear dimensions are in inches (millimeters).
- B. This drawing is subject to change without notice.
- C. Lead dimensions are not controlled within this area.
- D. All lead dimensions apply before solder dip.
- E. The center lead is in electrical contact with the mounting tab.
- F. The chamfer is optional.
- G. Thermal pad contour optional within these dimensions.
- H. Falls within JEDEC TO-220 variation AB, except minimum lead thickness.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.
