

Cube connection 16 x 4 multiplexed, common anode
 R17 to R20 Value 220 ohms
 For 12 mA current through each LED, R1 to R16 values dependent on LED Color used, 150 ohms for 3V Forward LED drop
 Capacitor C2 Value in PCB Assembly Instructions is 47µF/50V, it can be 10µF/16V as well as shown here
 10 Pin Header P2 ICSP is not shown in Schematics
 All resistors are quarter watt
